KATHAN GADHIYA

Email: 22kathan@gmail.com | Portfolio: 22kathan.github.io | GitHub: github.com/22kathan

PROFESSIONAL SUMMARY

Aspiring Data Scientist with deep grounding in applied statistics, machine learning pipelines, exploratory data analysis, and collaborative Git/GitHub workflows. Adept at transforming high-dimensional tabular telemetry into actionable models.

TECHNICAL SKILLS

Languages: Python (Pandas, NumPy, Scikit-Learn, Matplotlib, SciPy), SQL (PostgreSQL, BigQuery), Bash/PowerShell
Tools & Platforms: Git, GitHub Pages, Git LFS, nbdime, Jupyter, Docker, VS Code
Specialties: Hypothesis Testing, Regression Modeling, Bayesian Inference, Data Version Control

FEATURED DATA SCIENCE PROJECTS

1. Instagram Follower Growth & Engagement Analysis

- Analyzed 1.2M+ creator telemetry records to evaluate follower right-skewness and engagement decay curves.
- Formulated regression models predicting reel reach with 94.2% test accuracy using engagement features.

2. Zomato Restaurant Ratings & Delivery ETA Prediction

- Engineered transit distance, weather condition, and kitchen prep time features to predict delivery ETAs.
- Executed two-sample t-tests ($p = 0.0237$) quantifying Average Order Value changes across premium discounting cohorts.

3. IPL Batsman Impact & Boundary Dominance Analyzer

- Built modular Python data package categorizing players into Elite Match Winners, Power Hitters, and Anchors.
- Designed interactive scatter visualizer correlating strike rates against boundary dependency percentages.

EDUCATION & CERTIFICATIONS

Bachelor of Technology - Computer Science & Data Science | In Progress
Data Science Professional Specialization - Statistics, Linear Algebra & Machine Learning Engineering
