KATHAN GADHIYA

DATA SCIENTIST & AI DEVELOPER

+91 6353801051 • gadhiyakathan10@gmail.com • linkedin.com/in/kathan-gadhiya10 • github.com/22kathan • Portfolio■

PROFESSIONAL SUMMARY

Ambitious Data Scientist and AI Developer specializing in Computer Vision, Agentic AI, and Large-Scale Data Analytics. Experienced in architecting real-time AI engines (MediaPipe, WebSockets) and multi-modal verification platforms (PyTorch, Transformers). Proven track record in developing custom AI solutions, RAG pipelines, and automated data workflows while pursuing BTech in AI. Dedicated to deploying scalable machine learning models that bridge complex technical architectures with high-impact business solutions.

TECHNICAL SKILLS

AI, ML & Computer Vision: PyTorch, TensorFlow, OpenCV, MediaPipe, Deep Learning, Computer Vision, Model Deployment

Generative AI & LLMs: Agentic AI, LLMs, LangChain, RAG (Retrieval-Augmented Generation), Prompt Engineering, Transformers

Data Science & Analytics: Python (Pandas, NumPy, Scikit-Learn), SQL, Power BI, DAX, Exploratory Data Analysis (EDA), Statistical Modeling, Data Visualization

Development & MLOps: JavaScript/TypeScript, WebSockets, REST APIs, FastAPI, HTML5/CSS3, Git/GitHub, Docker, MLOps

EXPERIENCE & KEY PROJECTS

Flux Lead (Open Source Innovation) — **2026 – Present**

Real-time Gesture Control Engine (GitHub Repository | Live Demo)

- Engineered a gesture control system using MediaPipe, OpenCV, and WebSockets, reducing input latency
- Designed an interactive canvas sketching engine optimized for real-time 60 FPS AI hand-tracking and multi-gesture recognition.
- Collaborated with open-source contributors to establish modular API architecture and integrate Flux into cross-platform desktop environments.

TruthShield (AI Misinformation & Deepfake Detection Engine) — **2025 – Present**

Real-time Content Verification Platform (GitHub Repository | Live Demo)

- Architected an AI content verification platform using Deep Learning and NLP models to detect deepfakes, synthetic media, and fake news.
- Built real-time multi-modal analysis pipelines (text, audio, image) leveraging PyTorch, HuggingFace Transformers, and FastAPI with inference time.
- Designed interactive analytics dashboards and REST APIs to enable scalable automated content moderation and third-party verification.

EDUCATION

BTech in Artificial Intelligence — **2024 – 2028**

Gandhinagar University

- Specializing in Machine Learning Architecture, Deep Learning, Data Structures, and Neural Networks.

CERTIFICATIONS

- **AI Engineer Certification:** Advanced AI architecture, neural network deployment, and computer vision systems.
- **Python Programming Certification:** Professional proficiency in software development, data structures, and automation.
- **Data Science Certification:** End-to-end data science pipelines, statistical hypothesis testing, and machine learning models.
